RESULTS AND CONCLUSIONS

*From Dec.04.89 to Feb.04.90 the product: OLIO PROTETTIVO ESO-DEFEND -
PROTECTIVE ESO-DEFEND OIL (by NEW VILLA BORGHINI)*

was tested on 35 subjects.

None of the subjects exhibited appreciable reaction during the test period.

It can be concluded that the product is incapable of evoking irritation or allergic reactions detectable by the repeated patch test. This product can therefore be regarded as hypoallergenic.

Prof. Lucio Andreassi
